

# RADAR FOR THE LOST BARQUE

## New Discoveries In Ancient Egyptian Ships

PEARCE PAUL CREASMAN

University of Arizona, Laboratories of Tree-Ring Research &  
Project Director: Survey for the Ships of Pharaoh Senwosret III

Pharaoh Senwosret III, of dynasty XII, was equipped for the afterlife with a magnificent pyramid and at least 5 full size ships. Two of these large wooden vessels are on display in the United States and two in the Egyptian Museum, Cairo. Pearce Paul Creasman has undertaken an in-depth study of these four and a quest for the fifth. The ancient Egyptian techniques of shipbuilding & the fascinating practice of searching by use of remote sensing will be covered in the lecture.

**\* A FREE LECTURE**

\* Saturday, March 13, 2010

\* 7:00PM Meet the speaker / 7:30PM program

\* Room 123 Fondren Bldg., SMU Campus, 3215 Daniel
